Subject: Disease Surveillance & Control Division Monthly Activity Report – November 2025

A. Division of Disease Surveillance and Control

1. Number of Confirmed and Probable Cases of Selective Illnesses Reported

*This section has been modified to reflect calendar year reporting instead of fiscal year reporting, effective February 2023. This change is in line with MMWR reporting.

² Syphilis Unknown Duration or Late=CDC changed the case definition from Late Latent Syphilis to Syphilis Unknown Duration or Late

³ Counts under this section represent investigations conducted by ODS concerning pregnant persons with HIV or syphilis and do not reflect actual counts of cases diagnosed in the specified period. These investigations are aimed at monitoring and preventing adverse health outcomes, such as perinatal HIV transmission and congenital syphilis.

⁴ The count reflects ODS efforts around pregnant persons with HIV and is not a reflection of the total number of pregnant persons with HIV in our community. Persons living with HIV who become pregnant is not a reportable condition in Clark County.

Fup= Investigations initiated to follow up on previous reactors, partners, or clusters

3. Disease and Outbreak Investigations

- a. **Mpox:** As of December 1, 2025, Clark County had 332 cases of Mpox since the first reported case in 2022.
- b. **Influenza:** SNHD started the influenza surveillance for the 2025-2026 season on September 28, 2025. Influenza surveillance for Clark County, Nevada includes data collected from local acute care hospitals and other healthcare providers. Nationwide, Seasonal influenza activity remains low but is increasing. Statewide, outpatient respiratory illness activity in Nevada is minimal. Locally, as of 11/29/2025, during the 2025 - 2026 influenza season, 66 influenza-associated hospitalizations and 1 death have been reported and processed. The total number of cases presented in this report is subject to change due to potential delays in reporting and data processing. Influenza surveillance will continue through 5/23/2026.
- c. ACDC investigated a small gastrointestinal outbreak with 5 cases of illness in diners at 2 locations of an Asian buffet restaurant. 2 stool kits were distributed, and both were positive for norovirus. No further complaints were received. This investigation is closed.
- d. ACDC is investigating a small gastrointestinal outbreak with 10 ill persons out of a group of 14 who shared a meal at a restaurant on 11/30/25. No organism was identified as no stool samples were provided; 3 stool kits were distributed. There have been no further reported illness associated with the restaurant. Survey responses from ill diners are being analyzed.

4. Non-communicable Reports and Updates

- a. **Naloxone Training:** SNHD is training and distributing naloxone (Narcan®) to first responders and members of key community sectors throughout Nevada to better respond to the large-scale burden of opioid overdoses. Funding from SAMHSA's First Responders-Comprehensive Addiction and Recovery Act (FR-CARA), SAMHSA's State Opioid Response (SOR) via sub-awards from the University of Nevada Reno's Center for the Application of Substance Abuse Technologies, BJA's Comprehensive Opioid, Stimulant, and Substance Use Program (COSSUP), and the CDC's Overdose Data to Action (OD2A) program has been instrumental. ODS has implemented a policy for SNHD staff to carry and administer Naloxone. ODS has also been given permission at the Clark County Detention Center to place Naloxone in a person's property at the facility.

The following Naloxone distributions took place in the month of November:

Naloxone Distribution	Agency	# of Naloxone doses distributed

5. Prevention - Community Outreach/Provider Outreach/Education

- a. Ongoing promotion continues of the [Collect2Protect](#) (C2P) program, an online service for those requesting testing for gonorrhea, chlamydia, and at-home HIV test kits. The C2P program allows users to order an at-home HIV test kit conveniently and privately, at no cost and get their results at home. Test kits for chlamydia and gonorrhea are also available for a fee. Express Testing will also be available at SNHD's main public health center, 280 S. Decatur Blvd., Las Vegas, for those who are asymptomatic and would like to get tested and know their HIV status. ODS continues to work with OOC to help promote C2P on SNHD web sites, social media and with the help of community partners. The Center, Sagebrush Health, and AHF continue to offer ongoing HIV/STD, PrEP/PEP, and rapid stART services to the community. Free HIV testing is also available from 8 a.m. – 4:30 p.m. at the Southern Nevada Health District, 280 S. Decatur Blvd., Las Vegas, NV 89107 through the Express Testing/Annex A clinic.
- b. ODS continues to collaborate with community partners to participate at various outreach events. Our continued collaboration and presence at events in the community is key to gaining community trust and to help destigmatize HIV/STI testing which is vital to ending the HIV epidemic. ODS continues outreach efforts with community partners. On November 7 we returned to the McDonalds located at 3010 North Las Vegas Blvd (next to Broadacres Swap meet), on November 22 we returned to Club 5150 located at 5150 S. Pecos Rd, and on November 30 in observance of World Aids Day, we provided our services to a new partner, Obodo Collective. Obodo Collective is an urban farm/community garden located at 1300 C St in the heart of the Historic Westside Neighborhood .. As ODS strives to expand our reach to populations with high disease burden, having broader access points in the community are integral. At all the listed outreaches we provided our full services offering of rapid HIV and HCV testing, syphilis testing, overdose prevention services, PrEP navigation, condoms, and educational/informational navigation
- c. Distribution is ongoing - TB Surveillance developed a laminated flyer titled "Is it TB?" The content includes messaging that encourages providers to "think TB" when talking to their patients about their risks and symptoms. Additionally, there is reporting information and a QR code that links to the provider education training:

B. High Impact HIV/STD/Hepatitis Screening Sites

1. Testing is currently offered at Trac-B for HIV and Hep C. Also, The Center is offering screenings for HIV, Hep C, Gonorrhea, Chlamydia and Syphilis to the community Monday-Thursday from 1pm-5pm and every Saturday from 9am-2pm. AHF is also offering HIV and STD screenings at their Wellness Clinic locations on Monday, Wednesday, and Friday, and on their MTU.
