High Temperature Ware Washing Machine Log

Hot water sanitization is met when 160°F is reached at the surface of the item being washed.

The machine thermometer should read per manufacturer instructions.

Evaluate the temperature at least daily by using a waterproof min/max thermometer or temperature sensitive tape.

If the temperatures are less than required, notify the person in charge (PIC) immediately.

Document what action was taken to fix the problem.

Date	Time	Machine	Temperature/Sticker	Recorded By	Corrective Action	PIC Review
1/1/19	10:00am	Temperature 178°F	, ,	AB	Example	CD
	10.00aiii	170 1		Ab	Liample	CD
