

Southern Nevada Community Health Center Quality Improvement Report, February 2021

Fantasi 'Stasi' Pridgon, MHA, FQHC Quality Management Coordinator **FP**
David Kahananui, Senior FQHC Manager **DK**

COVID-19 Testing

As of February 28, 2021, the Southern Nevada Community Health Center has completed 33,579 COVID-19 tests. In February alone, 2,176 COVID-19 tests were completed at the Health Center, an increase of 4.4% over January.

There was a 9.7% positivity rate in February, a decrease of 7.3% over January. This is the lowest positivity rate the Health Center has seen since testing for COVID-19 began April 2020. The Southern Nevada Health District and the Health Center continue to remind the public of the importance of following public health recommendations to protect themselves and others to limit the spread of COVID-19 in the community.

Reminders include limiting time in public and wearing face coverings when in contact with anyone outside common households. Those who are sick should stay home and if they have been in contact with a person who has COVID-19 or think they have been exposed, they should get tested. Additional preventive measures include frequent handwashing, covering coughs and sneezes, and disinfecting frequently touched surfaces. The Health District and Health Center also encourages those who are eligible, and medically appropriate, to get the COVID-19 vaccine.

Quality Improvement

The Health Center is progressing in its implementation of CDSS (Decision Support) in eClinicalWorks (eCW), the electronic health record (EHR) at the Southern Nevada Health District and the Health Center. This project aims to improve quality by alerting providers when patients are due for various tests and preventive screenings across multiple quality reporting programs, including Family Planning Annual Report (FPAR), Healthcare Effectiveness Data and Information Set (HEDIS), HIV Quality of Care (HIVQUAL), and Uniform Data System (UDS).

The Health Center will focus on 60 performance measures that align across FPAR, HEDIS, HIVQUAL, and UDS and have been outlined in a crosswalk. Quality Measure workflows for eCW are in development and will be used as a method to train providers and staff on clinical documentation for CDSS be meaningful and effective in our quality improvement efforts.

Patient Satisfaction

The Health Center received 206 patient satisfaction surveys in February, an increase of 27.9% over January.

Family Health made of 55% of survey responses followed by Ryan White at 23% and Family Planning at 22%. Approximately 30.1% of patients seen at the Health Center in February took the patient satisfaction survey, an increase of 8.1% over January.

The Health Center received generally favorable responses from survey participants when asked about ease of scheduling an appointment, wait time to see their provider, care received from providers and staff, understanding of health care instructions following their visit, hours of operation, and recommendation of the Health Center to friends and family.

Please see the complete patient satisfaction survey reports in English and Spanish attached.

Telehealth

The Health Center implemented telehealth following the need for modified clinic operations as we continue to navigate the COVID-19 pandemic. The goal of the Health Center is to continue fulfilling its mission to provide safe, quality healthcare to the community amid the COVID-19 public health emergency. Health Center patients are seen by providers via audio (telephone) and video via Healow, an app by eClinicalWorks. Though patients can still be

seen in-person, when medically appropriate, telehealth is offered and encouraged to be utilized, especially as we continue to navigate the COVID-19 pandemic.

The following is a breakdown of telehealth visit volume since implementation in April 2020:

- In the month of April, telehealth saw 204 patients — 18% of Health Center visits.
- In the month of May, telehealth saw 179 patients — 15.1% of Health Center visits and a 12.3% decrease over the month prior.
- In the month of June, telehealth saw 106 patients — 7.6% of Health Center visits and a 40.8% decrease over the month prior.
- In the month of July, telehealth saw 53 patients — 4.3% of Health Center visits and a 50% decrease over the month prior
- In the month of August, telehealth saw 47 patients — 4.2% of patient visits, an 11.3% decrease over the month prior.
- In the month of September, telehealth saw 39 patients — 6% of patient visits.
- In the month of October, telehealth saw 28 patients — 4.3% of patient visits, a 28.2% decrease over the month prior.
- In the month of November, telehealth saw 31 patients — 5.1% of patient visits, an increase of 10.7% over the month prior.
- In the month of December, telehealth saw 88 patients — 13.5% of patient visits, an increase of 183.9% over the month prior.
- In January 2021, telehealth saw 46 patients — 6.2% of patient visits, a decrease of 47.7% over the month prior.
- In February 2021, telehealth saw 59 patients — 8.6% of patient visits, an increase of 28.3% over the month prior.

As with other health care organizations across the county and state, telehealth visits had declined over the past few months. This was largely due to an increase in in-person patient visits following incremental phases to pre-COVID-19 operations. However, as we continue to respond to the COVID-19 pandemic, increases in telehealth utilization is expected as health care organizations adapt, and patients seek care as safely as possible.

NOTE: As of September 1, 2020, the Sexual Health Clinic is no longer a part of the Health Center. This has resulted in an overall decrease in visit volume.

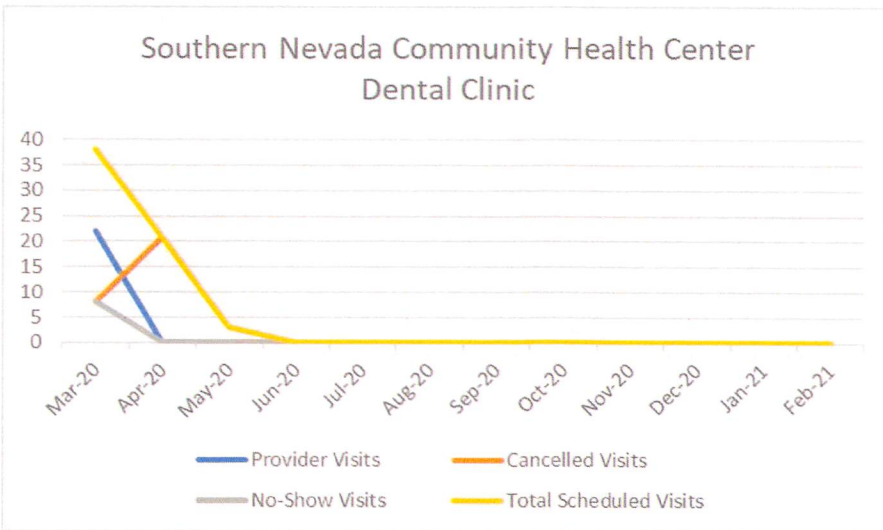

Health Center Visits

The Health Center had 1,067 scheduled patient appointments in February, a 6.4% decrease over January. Of scheduled patients, 64.2% kept their appointments, a 1.2% decrease over January; there was a 8.8% cancellation rate, an increase of 1% over January, and a 26.9% no-show rate, an increase of less than 1% over January. Telemedicine saw 59 patients — 8.6% of patient visits, an increase of 28.3% over January.

Of scheduled patient appointments, cancellation rates were highest among Ryan White and Family Health at 54.3% and 32.9%, respectively. The no-show rate was highest among Ryan White and Family Health at 55.6% and 26.7%, respectively.

NOTE: As of September 1, 2020, the Sexual Health Clinic is no longer a part of the Health Center. This has resulted in an overall decrease in visit volume.
