

Waste Tire Hauler Additional Information

1. What is a Waste Tire?

Per the Solid Waste Management Authority Regulations, a “waste tire” means a tire that is not fit for use as a tire. For example, if a vehicle has a tire replaced at an automotive maintenance facility, the tire that is removed would be considered a waste tire, as the automotive facility has deemed that the tire is no longer fit or safe for continued use.

2. Do I need a Waste Tire Hauler permit?

While the definition of a Waste Tire Hauler is defined in the Solid Waste Management Authority Regulations and Nevada Administrative Code, not all haulers of waste tires may need a permit.

In Clark County, Nevada, a permit is required when a hauler of waste tires picks up a waste tire or tires from a point of generation and hauls them to a site for disposal. For example, a vehicle used to transport waste tires to a facility or location that will accept the tires for disposal would need to apply for and maintain a Waste Tire Hauler permit from the Southern Nevada Health District.

3. Are there exemptions from requiring a Waste Tire Hauler permit?

There are several exemptions from the requirements of needing a permit from the Southern Nevada Health District.

- If you generate or cause to be generated the waste tires and haul them to a facility or site that will accept them from disposal you do not need to apply for a permit. For example, a tire shop does not need a waste tire hauler permit if they transport their tires to a permitted disposal facility. Another example is, is

if a company performs roadside or mobile tire changing services, they will not need a Waste Tire Hauler permit.

- If you are transporting the tires to be reused, refurbished, or retreaded. Any hauler who picks up the waste tires from a point of generation and takes them to a site to have the tires evaluated for reuse, refurbishment, or retreading does not need a Waste Tire Hauler permit.
- Any person or business who is directed by the Solid Waste Management Authority to haul waste tires does not need a permit.

If you believe any of the exemptions apply to you or your business' practice, please submit documentation in writing to the Southern Nevada Health District demonstrating what your business practices are any why you should be exempt from the requirements of a Waste Tire Hauler Permit.

4. How do I apply for a Waste Tire Hauler Permit?

Complete and submit your waste tire hauling permit application. A Waste Tire Hauler permit application can be found by visiting the following website:
<https://www.southernnevadahealthdistrict.org/download/eh/solid-waste/waste-tire-hauler-permit-application.pdf>

- Faxing it to: (702) 759-1427
- Emailing it to: **UST@SNHD.ORG**
- Regular Mail: Southern Nevada Health District
Solid Waste and Compliance Section
PO BOX 3902
Las Vegas, Nevada 89127

5. What are the requirements of a permitted Waste Tire Hauler?

A waste tire hauler must initiate a manifest to transport waste tires from the point of generation where they take possession of the waste tires. The waste tire manifest must include the following information:

- Name of the generator of waste tires.
- Passenger tire equivalents or total tons of waste tires to be transported.
- Name and permit number of the waste tire hauler.
- Number of tires claimed for reuse or resale.
- Date of transport.
- Destination of waste tires.
- Signature of the generator of the waste tires, hauler of the waste tires and the operator of either the permitted waste tire management facility or permitted disposal facility.

The Southern Nevada Health District has a downloadable manifest template on the Waste Tire Hauler Program webpage:
