

Reportable Diseases, Conditions and Events

Clark County, Nevada

The Nevada Administrative Code Chapter 441A and county disease reporting regulations require reports of specified diseases, foodborne illness outbreaks and extraordinary occurrences of illness be made to the local Health Authority (Southern Nevada Health District [SNHD]). Disease reporting allows SNHD to rapidly respond and prevent additional illness, recognize trends in diseases of public health importance and to intervene in outbreak or epidemic situations

Physicians, veterinarians, dentists, chiropractors, registered nurses, directors of medical facilities, medical laboratories, blood banks, school authorities, college administrators, directors of childcare facilities, nursing homes, parole and probation officers, pharmacists, insurers and correctional institutions are required to report. Failure to report is a misdemeanor and may be subject to an administrative fine of \$1,000 for each violation.
