CERTIFICATE OF OCCUPANCY

This certificate is issued to Section 309 of the 1997 Uniform Administrative Code.

At the time of issuance, this building was deemed to be in substantial compliance with fire, safety and structural provisions of the adopted building codes based upon periodic inspections of work during construction. This certificate of occupancy should not be relied upon as evidence that the construction is in actual compliance with all applicable building codes or that the construction meets the minimum standards of a specific industry.

RE: TES-AMM
Request for Certificate of Exemption

RECEIVED CC DAQ
2022 DEC 19 PM3:26

Jan

On behalf of TES-AMM, Broadbent & Associates, Inc. (Broadbent) is pleased to present a request for a Certificate of Exemption from Clark County Department of Environment & Sustainability, Division of Air Quality (DAQ) for the proposed TES-AMM facility. TES-AMM is an electronic repair and drive wiping company that plans to build an electronic repair/drive wiping center in Henderson, NV. Those hard drives and solid state drives that cannot be wiped will be processed through a shredder. Particulate emissions will be captured by a HEPA filter. No emission factors were found for this shredding operation and the HEPA filter manufacturer was unable to provide a grain loading rate. Accordingly, Broadbent is proposing to use the largest DAQ emission factor for crushing and assume 8,760 hours of operation at the maximum feed rate of the shredder. Using this approach, the maximum amount of uncontrolled PM₁₀ emitted from the process would be 0.43 tons/year. Based on this assessment, the facility does not meet the Minor Source threshold for requiring a permit in Clark County.

TES-AMM and Broadbent request that a draft copy of the Certificate of Exemption be emailed to both the source and the consultant for review prior to issuance. Should you have any questions regarding this submittal, please do not hesitate to contact me at walexander@broadbentinc.com or (702) 563-0600.

Sincerely,
Broadbent & Associates, Inc.

Date

Exempt Stationary Source Determination:

The Clark County Department of Environment and Sustainability, Division of Air Quality (DAQ) has received an application for the subject source. DAQ has determined the source's emissions of regulated air pollutants do not exceed the applicability thresholds; the source does not need to obtain a minor source permit under Section 12.1 of the Clark County Air Quality Regulations (AQRs) if

all equipment and activities emitting regulated air pollutants at the source conform to this certificate.

Table 1 lists the equipment and activities emitting regulated air pollutants at this exempt stationary source.

Table 1. Summary of Equipment and Activities Emitting Regulated Air Pollutants

Equipment/Activity Number	Description	Rating
A01	Solid-State Drive/Hard Drive Shredder	2,000 drives/hr

The emissions calculated for this exempt stationary source are based on the equipment and activities listed in Table 1. Table 2 summarizes the applicability emissions of all regulated air pollutants from this source that are relevant to applicability determinations.

Table 2. Permit Applicability Thresholds and Applicability Emissions (Tons/Year)

Pollutant	PM ₁₀	PM _{2.5}	NO _x	CO	SO ₂	VOC	H ₂ S	Lead
Permit Applicability Thresholds	5	5	5	25	25	5	1	0.30
Source Applicability Emissions	1.02	0	0	0	0	0	0	0

Applicable Requirements:

Pursuant to AQR 26, no person shall cause, suffer, or permit any equipment or activity to discharge any air contaminant above an average 20% opacity for more than six consecutive minutes. Pursuant to AQRs 40 and 43, no person shall cause, suffer, or allow the source to discharge air contaminants (or other material) in quantities that will cause a nuisance, including excessive odors. However, no federal regulation has been identified for this source. The equipment and activities identified in this document may be subject to other state or local air quality regulations.

Required Compliance Demonstration:

1. The owner/operator shall create and maintain the following records, all of which must be producible on-site to the Control Officer's authorized representative upon request and without prior notice during the owner/operator's hours of operation:
 - a. Total monthly quantity of drives (solid-state and hard drives) shredded.
2. Any changes to the equipment and/or activities emitting regulated air pollutants will invalidate this certificate. Before exceeding the permit applicability thresholds for a minor stationary source, the owner/operator of this source must apply for and receive a permit for a stationary source pursuant to the AQRs.

DAQ has a Small Business Assistance Program (SBAP) to assist small business owners and operators with permitting and compliance matters. If you have any questions or require any further assistance, please contact DAQ at (702) 455-5942.

SO ₂	sulfur dioxide
TDS	total dissolved solids
TSD	Technical Support Document
UTM	Universal Transverse Mercator
VAEL	Voluntarily Accepted Emission Limit
VMT	vehicle miles traveled
VOC	volatile organic compound

Technical Support Document

This TSD establishes the methodology related to the terms and conditions of its Minor Source Permit issued pursuant to Clark County Department of Air Quality Regulations (AQR) Section 12.1. The TSD shall not serve as the operating authority.

Source Description

TES-AMM is an electronic repair and drive wiping and recycling operation located in Hydrographic Area 212, the Las Vegas Valley. This source category falls under SIC code 5045, “Computers, Peripherals, and Software,” and NAICS code 423430, “Computer and Computer Peripheral Equipment and Software Merchant Wholesalers.” The source consists of a solid-state drive and hard drive shredder.

Permitting Action

This is a new source of air pollutants that is submitting an application for a new AQR 12.1 permit applicability determination.

The source is an exempt stationary source, as defined in AQR 12.1.1(a), and will be issued a Certificate of Exemption pursuant to AQR 12.1.2(b).

The responsible official is required to comply with recordkeeping requirements listed in the Certificate of Exemption.

Emission Units

Table 1 lists the emission units at this stationary source.

Table 1. Emission Units List

EU	Rating	Type	Manufacturer	Model No.	Serial No.	SCC
A01	2000 drives/hr	Hard Drive/Solid State Drive Shredder	Ameri-Shred Corp.	AMS-1000HD-SSD	TBD	31399999

Calculation of Emissions

Applicability

AQR 12.1.0 permitting applicability is determined by calculating the emissions for all proposed emission units using 8,760 hours of operation (except for emergency generators or fire pumps, which use 500 hours), any inherent controls, any inherent throughput limitations, and the emission factors provided by the manufacturer, by source test results, by EPA AP-42, or by other approved methods.

Applicability emissions include emissions from insignificant emission units and activities, but do not include fugitive emissions (except for categorical sources listed in AQR 12.2.2(j) or any other

stationary source category that, as of August 7, 1980, is being regulated under Sections 111 or 112 of the Act).

There are no AP-42 or DAQ emission factors for electronics shredding. Therefore, the permittee proposed using DAQ emission factors for alluvial stone crushing to estimate worst-case scenario emissions for the shredder. The maximum-rated capacity of the shredder (2,000 SSD/HD drives per hour) is based on the manufacturer's specifications. The average weight per drive (0.75 pounds) is based on estimates by the permittee.

DAQ recalculated applicability emissions for the source used using the AP-42 PM₁₀ emission factor for dry grinding of metallic minerals (EPA AP-42 Table 11.24-2). DAQ selected the metallic minerals grinding emission factor because it more closely approximates the process and materials for electronic shredding. The PM₁₀ emission factor for metallic mineral grinding (0.31 lbs/ton) is also higher than the alluvial crushing emission factor (0.13 lbs/ton), therefore providing a worst-case scenario for applicability emissions. The metallic minerals grinding emission factor does not include PM_{2.5}, so DAQ assumed PM_{2.5} emissions are equivalent to PM₁₀ emissions.

Applicability emissions calculations are included in the attachments.

Table 2 shows the thresholds for AQR 12.1.1(d) applicability.

Table 2. AQR 12.1.1(d) Applicability Emissions Evaluation (tons per year)

Pollutant	PM ₁₀	PM _{2.5}	NO _x	CO	SO ₂	VOC	H ₂ S	Pb	HAP ¹
Applicability Thresholds	5	5	5	25	25	5	1	0.3	n/a
Major Source Thresholds	100	100	100	100	100	100	n/a	100	10/25
Nonattainment NSR Thresholds	100	100	100	100	100	100	n/a	100	n/a
PSD Thresholds	250	250	250	250	250	250	n/a	250	n/a
Applicability Emissions Total	1.02	1.02	0	0	0	0	0	0	0

¹10 tons for any single HAP, or 25 tons for any combination of HAP pollutants.

AQR 12.1 is applicable to any stationary source located in Clark County that has the potential to emit (PTE) a regulated air pollutant equal to or greater than the thresholds listed in AQR 12.1.1(d), as shown in Table 2, but less than the major source thresholds listed in AQRs 12.2.2(ff) or 12.3.2(r).

AQR 12.1 is also applicable to any Part 70 source that is exempt from the requirement to obtain a Part 70 operating permit and has a PTE that equals or exceeds the thresholds listed in AQR 12.1.1(d), or to any source that takes a voluntarily accepted emission limit or standard pursuant to AQR 12.1.7 to avoid obtaining a Part 70 operating permit. See the attachment for calculations.

This source does not exceed any of the thresholds for a minor source and will not be subject to the permitting requirements of AQR 12.1. It will be an exempt stationary source, as defined in AQR 12.1.1(a), and will be issued a certificate of exemption pursuant to AQR 12.1.2(e).

NEW01 New emission unit

PRODUCTION INFORMATION

INHERENT LIMITATIONS

Production Information

- It is requested that the throughput of the Shredder (NEW01) be limited to 6,570 tons per year.
- It is requested that the Shredder (NEW01) be permitted to operate up to 24 hours per day and 8,760 hours per year.

Inherent Limitations

There are no inherent limitations.

SOURCE-WIDE EMISSIONS

Applicability Determination

EU	Rating	Conditions	PM ₁₀	PM _{2.5}	NO _x	CO	SO _x	VOC
NEW01	0.75 tons/hr	8,760 hours/yr	0.43	0.08	-	-	-	-
Totals (tons/yr)			0.43	0.08	0.00	0.00	0.00	0.00
Permit Applicability (tons/yr)			5	5	5	25	25	5
Permit Required?			No	No	No	No	No	No

NOTES: There is only one source of pollutants and it only emits particulate matter. This is for shredding electronic equipment, which will have less emissions than Alluvial crushing.
The Alluvial crushing emission factors represent a worst case scenario for generating particulate matter.

EMISSION UNIT CALCULATIONS

Uncontrolled Emissions

Uncontrolled Emissions for Solid State Drive Shredder
Model AMS-1000HD-SSD (NEW01)

	Facility Throughput	Mass per Circuit Board	Facility Throughput	Hours	Emission Factor: DAQ Alluvial Stone Crushing	Emission Factor: DAQ Alluvial Stone Crushing	Total Uncaptured PM10 Emissions			Total Uncaptured PM2.5 Emissions		
Emission Unit	(boards/hr)	(lb/board)	(tons/hr)	(hours/yr)	(lb PM ₁₀ /ton)	(lb PM _{2.5} /ton)	(lb pollutant/hour)	(lb pollutant/year)	TPY PM10	(lb pollutant/hour)	(lb pollutant/year)	TPY PM2.5
NEW01	2,000	0.75	0.75	8,760	0.13	0.025	0.098	854.10	0.43	0.019	164.25	0.08

NOTE: Uncontrolled emission factor for Alluvial crushing in Clark County. DAQ EF of 0.13lbs/ton PM₁₀ and 0.025 lbs/ton PM_{2.5}. These factors were selected as they are the largest emission factors for crushing.
Board feeding into the machine is done by hand. Assumed one board every 3 seconds (significant overestimation) but we are using max rated capacity assuming a feeder (that won't be used)
Average Circuit Board mass provided by source from experience at similar facilities in the US

AIR FILTRATION SYSTEMS

Optional on Solid State Drive Shredders: Series 2 & Series 3

The AMS air filtration system was designed to help reduce possible odors and/or contaminants from escaping into the atmosphere during solid state drive destruction.

Standard Features:

- Inexpensive and disposable pre-filter protects the blower and HEPA filter
- The blower is housed in cast aluminum
- The blast gate serves as an air flow control valve

SPECIFICATION CHART

Motor	1 HP TEFC
Air Flow	400 CFM at 3" static water gauge pressure
Efficiency	99.97% on particles 0.3 micron and larger

Ameri-Shred's air filtration systems consist of six major components which include the inlet, pre-filter, blower, blast gate, HEPA filter and ductwork.

An air filtration system must be part of your original order. It cannot be retrofit at a later date.

FEDERAL PERFORMANCE STANDARDS

Federal Performance Standards

There are no applicable federal performance standards for this proposed facility.

PLANNING COMMISSION

STAFF REVIEW DATE: 5/04/2023

PLANNING COMMISSION DATE: 6/15/2023

CONTACT PERSON: MITCHELL RUNKO 5238 ROYAL WOODS PARKWAY TUCKER, GA 30084 PHONE: (732) 749-0964 EMAIL : mitchell.runko@tes-amm.com	APPLICATION NUMBER: CUP-2023012612
	PROJECT NAME: TES-AMM RECYCLING CENTER
	PROJECT PLANNER: CARLA BURRELL (702) 267-1519 CARLA.BURRELL@CITYOFHENDERSON.COM

The following information must be submitted to the departments indicated below by 9:00 am on **5/15/23** or the application(s) will be removed from the **6/15/23** Planning Commission agenda. Only those departments marked with an (X) below have requested copies of revisions.

<input checked="" type="checkbox"/>	Fire Dept. (FD)	<input type="checkbox"/>	Survey/Right-of-Way (ROW)	<input type="checkbox"/>	Public Works-Traffic (PW-TR)
<input type="checkbox"/>	Utility Services (US)	<input type="checkbox"/>	Parks & Recreation (PR)	<input type="checkbox"/>	Public Works-Land Development (PW-LD)
<input type="checkbox"/>	PW – Flood (PW-FLD)	<input type="checkbox"/>	Community Police (CP)	<input checked="" type="checkbox"/>	Community Development (CD)

It is highly recommended that the applicant or representative attend the Planning Commission meeting; a vote may not occur if no representative is present.

ADDITIONAL INFO/REVISIONS REQUIRED

1. Provide responses to required standards for use...
2. Please clarify what is being done to reduce the potentially hazardous nature of the 1% of recycled materials being diverted to landfills. In addition, please demonstrate why the identified 1% of recycled materials are NOT considered hazardous and indicate which Nevada Revised Statutes (NRS) designates the distinction. (CD)
3. It appears that the Clark County Certificate of Exemption was requested and received by Clark County on December 19, 2022. Please provide the approved Clark County Certificate of Exemption to be added to this CUP application. The draft copy from Clark County would suffice as well. (CD)
4. Please provide the anticipated percentage of refurbished materials versus those that may be destroyed (shredded) in this facility. (CD)
5. Please elaborate on the proposed "drive wiping" process and procedure mentioned in the Clark County request for Certificate of Exemption. (CD)
6. Please provide a haul route exhibit that documents the proposed haul route to and from the recycling center to/from collection sites and/or shipping locations. A traffic study may be required. Also, identify the number of anticipated trucks circulating through the facility daily. (CD)
7. Storing materials on the bare ground is prohibited by Code. Please identify how materials and/or recyclables will be stored; on an impervious surface, in boxes/bins/containers, etc. (CD)

Additional Information Form

8. Please clarify and provide the details (site plan, elevation, design details, color/materials, etc.) of the building modification involving the shredder mentioned in the justification letter. (CD)
9. Please identify any noise reduction strategies employed for the proposed operation. (CD)
10. Please clarify which shredder the applicant plans to utilize for the proposed operations – one, the other, or both. Two are displayed in the backup information. (CD)
11. Please respond completely to Sec. 19.22.7.A.1. through 8 – Required Findings for the Conditional Use Permit Application. (CD)
12. Applicant shall provide a Fire Protection & Risk Assessment Report prior to this item being heard at Planning Commission. This Report shall be prepared by an FPE registered in the State of Nevada and shall address haz-mat quantities and processes as well as battery storage and handling. (FD)

FYI ITEMS - NO REVISIONS REQUIRED:

13. None.

Electronic Submittal Instructions

**UNTIL FURTHER NOTICE, ALL REVISIONS MUST BE
EMAILED TO THE PROJECT PLANNER**

ALL REVISIONS MUST BE EMAILED AS PDF DOCUMENTS

1. All application revisions and additional information must be emailed in PDF format by the deadline referenced on the first page of the additional information form. Please email them to your Project Planner plus the staff members from each department marked with an "X" on your comment sheet. **PLEASE DO NOT UPLOAD ANY ENTITLEMENT APPLICATION REVISIONS THROUGH A BLUEBEAM SESSION.**
2. **Provide a letter responding to each of the staff review comments.** Number the responses according to each staff review comment number. Provide a copy of the staff review comment sheet with your re-submittal.
