

Southern Nevada Public Health Laboratory
TEST MENU

Coxiella burnetti by qRT-PCR Assay

Method	Nucleic acid detection by real-time Reverse Transcriptase Polymerase Chain Reaction (qRT-PCR) Centers for Disease Control and Prevention (CDC) FDA approved method
CPT Code	87801 Infectious agent detection by Nucleic Acid (RNA or DNA), Multiple Organisms 83891 Extraction of highly purified nucleic acid
Specimen	Whole blood
Collect in	Evacuated sample collection tube
Labeling	Label with patient's full name, date of birth, collection time and date
Special Notes	Indicate specimen source on requisition form
Transport	Store and transport refrigerated (2-8°C) within 72 hours or freeze (-20 ° C)
Sample Rejection	- Mislabeled/unlabeled specimen - Specimen quantity not sufficient for testing (QNS)
Requisition	SNPHL Request Forms Testing is performed only at the request of SNHD Office of Epidemiology
Turn Around Time	24 hours following receipt in our laboratory
Results	Coxiella burnetti DNA detected (positive) or not detected (negative)
Reported	System generated fax; Electronic transmission
Note	If inhibitors are present in DNA extraction, PCR assays may produce a false negative result. A false negative result may occur if a sample is improperly collected, transported, or handled. False negative results may occur if inadequate numbers of organisms are present in the sample
